TypeScript, Javascript	User Research	Responsive Design
HTML/CSS	Information Architecture	Firebase
Tailwind CSS		Git

WORK EXPERIENCE

- Frontend developer | FAMTECH, Nigeria** Mar 2025 - present
- Architected and developed the frontend for a new SaaS platform MVP and its primary landing page, leveraging Next.js/React to establish a highly optimized, performant development and production environment.
 - Partnered with design and product teams to deliver a user-centric experience that significantly enhanced user experience and conversion rates, fostering seamless cross-functional collaboration to meet aggressive delivery goals.
- Frontend developer/UI Designer | HYPERBUDS, United states** Jun 2025 - present
- Spearheaded the UI/UX design and frontend development for the SaaS platform and key landing pages, integrating Firebase (Auth/Firestore) to establish scalable user authentication and real-time data functionality.
 - Acted as a supervisory collaborator within the design and development team, ensuring code quality and efficient delivery through expert management of the Git version control and prompt resolution of complex merge conflicts.
- Frontend developer/UI Designer | CHRIVON, Nigeria** Jan 2025
- Designed and developed the application's primary landing page using [html, css and javascript], ensuring adherence to mobile-first and WCAG Accessibility standards.
 - Translated high-fidelity Figma/Sketch designs into a clean, modular, and pixel-perfect codebase, significantly improving the user's first impression and brand trust.
- Frontend developer | Fatty Exchange, Nigeria** Oct 2024
- Designed and developed a responsive, high-fidelity web landing page, ensuring optimal user experience and seamless functionality across all device screens.
 - Actively contributed to the product's visual identity by delivering clean, maintainable frontend code while adhering to established UI/UX design standards.
